

Announcements with 'One Call Now'

The Village of New Bremen has implemented a resident notification system called One Call Now. The system will be used to contact residents, providing quick and efficient messages that help keep residents informed of important information. The system will be utilized for street closings, parking notices, utility outages, and throughout projects to minimize impacts to residents.

Residents can receive calls to two phone numbers. Please note that all numbers listed will be contacted when we use the system. You can 'opt in' to receive text messages from the voice message. The most important thing residents can do is to make sure you inform the Village of changes in your contact information. We must have updated phone numbers for the system to work effectively.

Please complete and return to:
